

Unit ID **Hydraulic excavator**
 Component **Bio-hydraulic fluid**
 Current sample number **1700781**

+49 8034-9047-210

OELCHECK GmbH · Kerschelweg 28 · 83098 Brannenburg

Machine type: **A 900 Litronic**
 Manufacturer: **Liebherr**
 Oil brand name: **Panolin HLP Synth 46**
 Oil quantity in system: **280 l**

Example report
 Analysis scope: Analysis-Kit 3 (Bioset)

Diagnosis for the current laboratory values

The mineral oil content is less than 2% due to oil change or mixture with a mineral-oil based hydraulic oil. The values for wear metals have only increased slightly. This low wear is within the normal range. The water content is close to critical. The value for silicon, which indicates dust, has increased. Oil cleanliness is lower than recommended by component manufacturers. The oil cleanliness should be improved by changing the filter element or by additional bypass filtration. Please observe further changes with the next sample. I recommend that you send us another oil sample in app. 500 hours. If the oil cleanliness is improved, no oil change is required during this period.

Dipl.-Ing. Andy Böhme (MLA II + CLS)
