NEW

All-inclusive OELCHECK KIT for PAPER MACHINES

With the new paper machine kit OELCHECK makes your work easier. Instead of analysis kits with different scope of analysis, you now only have one type of sample bottles. Regardless of the system component, the same kit type can be used as required for the lubricants and operating fluids. It is even easier if you transfer the sample data directly to our customer portal **www.lab.report** using the OELCHECK-App.

For the sampling of grease samples, we recommend the use of our special grease sampling kit with a reusable syringe, a hose and three spatulas.
